

Section Wipes (manual)

```
<style type="text/css">
    #pinContainer {
        width: 100%;
        height: 100%;
        overflow: hidden;
    }
    .panel {
        height: 100%;
        width: 100%;
        position: absolute;
    }
</style>
<div id="pinContainer">
    <section class="panel blue">
        <b>ONE</b>
    </section>
    <section class="panel turquoise">
        <b>TWO</b>
    </section>
    <section class="panel green">
        <b>THREE</b>
    </section>
    <section class="panel bordeaux">
        <b>FOUR</b>
    </section>
</div>
<script>
    $(function () { // wait for document ready
        // init
        var controller = new ScrollMagic.Controller();

        // define movement of panels
        var wipeAnimation = new TimelineMax()
            .fromTo("section.panel.turquoise", 1, {x: "-100%"}, {x: "0%", ease: Linear.easeNone}) // in from left
            .fromTo("section.panel.green", 1, {x: "100%"}, {x: "0%", ease: Linear.easeNone}) // in from right
            .fromTo("section.panel.bordeaux", 1, {y: "-100%"}, {y: "0%", ease: Linear.easeNone}); // in from top

        // create scene to pin and link animation
        new ScrollMagic.Scene({
            triggerElement: "#pinContainer",
            triggerHook: "onLeave",
            duration: "300%"
        })
            .setPin("#pinContainer")
            .setTween(wipeAnimation)
            .addIndicators() // add indicators (requires plugin)
            .addTo(controller);
    });
</script>
